

Cape Henlopen State Park

Trail Characteristics

Trail Characteristics	2018 Trail Network (miles)	Proposed Trail Network (miles)	Net Change (miles)
	18.3	30.8	+12.5
Surface			
Natural	3.3	7.4	+4.1
Hardened	15.0	23.4	+8.4
Width			
Single Track	4.7	14.0	+9.3
Double Track	13.6	16.8	+2.2
Permitted Use			
Pedestrian Only	3.3	3.3	0
Pedestrian Bike	15.0	25.7	+10.7
Equestrian	0	1.8	+1.8
(Beach Only*)	4.6*	4.6*	0
Accessibility			
Accessible	14.8	22.7	+7.9
Not Accessible	3.5	8.1	+4.6
Park Areas			
East Side (Ocean)	14.2	18.9	+4.7
West Side	4.1	11.9	+7.8

Notes for Cape Henlopen State Park

12.5 additional trail miles for the park is attributed to expanding single track pedestrian and biking experiences and building upon the regional trail loop system by adding another segment to the Cape to Georgetown Rail Trail.

8.4 miles of hardened trail would be added to the trail system. Currently 15.0 of the 18.3 trail miles are hardened (stone or paved) and open to pedestrian and bicycle users. Under the proposed trail plan, hardened surfacing would increase to improve sustainability and provide a wider range of accessible trail opportunities in the park.

- Current Accessible Trails within park boundary:
- Junction & Breakwater Trail (3.8 miles)
 - Gordons Pond Trail (3.1 miles)
 - Cape Bike Loop (3.3 miles)
 - Walking Dune Trail (2.6 miles)
- Future Accessible Trails:
- Great Dune Trail
 - Cape to Georgetown Rail Trail – park entrance to Freeman Hwy segment
